EXPERIENCE

Artificial Intelligence Algorithm Engineer

JD.com, Inc

Jul 2018 – Nov 2019 Beijing, China

- Comment Image Quality Rank System(Image Processing, 6 months) Implemented image classification & detection & quality/aesthetic evaluation modules to give a comprehensive score for consumers' comment image ranking as well as JD's online recommendation system
- Text Message Risk Control System(Text Processing, 3 months) Developed text classification models to identify prohibited/advertising text for DongDong (An instant messaging software)
- Bar-code decoding system for JD's Smart Medical Container(Image Processing, 2 months) Developed an auto bar-code detection & decoding system (on ARM) to eliminate manual scanning process
- Daojia-Go Smart Retailer(Big data, 3 months) Developed a sale-forecast system to reduce the cost of goods replenishment, and a product recommendation system to increase sales

Master Student Research on Multi-path Clutter Suppression and Multi-frame Signal Processing of Passive Radar

Institute of Electrics, Chinese Academy of Sciences

Sep 2015 – Jun 2018 Beijing, China

- Based on the characteristics of digital television signals, proposes a method of suppressing multipath clutter using the k-forward prediction algorithm, and implements time-domain filtering based on least-mean-square error criterion
- Based on the Detect-Before-Track technology, introduces DBSCAN algorithm to multi-frame radar signal processing to improve weak-target detection performance
- Based on the affluent observation information of SITO passive radar system, proposes an improved DP-TBD algorithm to further improve weak-target detection performance

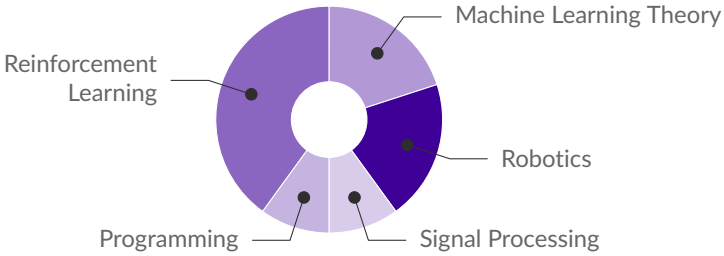
Audio Signal Processing Engineer (Intern)

Extantfuture.com, Inc.

Mar 2015 – Jul 2015 Beijing, China

- Adaptive digital filter design for noise reduction
- Physical information extraction

RESEARCH INTEREST



STRENGTHS

Python | Matlab | C++ | Emacs | Machine Learning | Digital Signal Processing | Eager to Learn | Hard-working

EDUCATION

M.S. in Communication and Information System

University of Chinese Academy of Sciences

Sep 2015 – Jun 2018 Beijing, China

- Supervisor: Daojing Li (Professor, National Key Laboratory of Science and Technology on Microwave Imaging, Institute of Electrics, Chinese Academy of Sciences)
- Honors/Awards:
  - 2017 Academic Scholarship
  - 2016 Academic Scholarship
  - 2015 Academic Scholarship
  - 2015 Excellent Student Cadre
  - 2015 Triple-A Student

B.E. in Electronic and Information Engineering

Xidian University (211 project)

Sep 2010 – Jun 2014 Xi'an, China

- Honors/Awards:
  - 2013 The Second Prize of China Undergraduate Mathematical Contest in Modeling
  - 2013 The Second Prize of Xidian's Electronic Competition
  - 2012 The First Prize of Xidian's Mathematical Contest in Modeling
